## 1234YF ACS Recovering, Recycling and Recharging Machine

Mfr: Robinair Part #: ROBAC1234-6

Features and Benefits: **\$5490.00**

- Fully automatic operation — program for service, walk away and return when complete
- Services both standard and hybrid vehicle A/C systems
- 95% recovery efficiency
- Integrated refrigerant identifier (meets SAE J2927)
- 1/4 Color VGA display and on board printer
- Made in the USA

The AC1234-6 is the only product available today that fully meets SAE's requirement for recovering, recycling and recharging vehicle A/C systems that use the new R1234YF refrigerant. The AC1234-6 is a fully automatic ACS machine that comes with an integrated refrigerant identifier that samples the refrigerant in the vehicle's A/C system prior to recovery, is a highly accurate and reliable machine, and can service both standard and hybrid vehicle A/C systems.

## R134A Refrigerant Recovery, Recycling, and Recharging Machine for Hybrid and Non-Hybrid Vehicles

Mfr: Robinair

Part #: ROB34788NI-H

Features and Benefits: **\$3725.00**

- One machine to safely service both conventional and high voltage A/C systems
- Fully automatic operation
- Improved recovery and charge performance - Exceeds SAE requirements
- Expandable - capable of additional feature and function add-ons (printer, wireless, refrigerant ID)
- Automatic internal tank fill
- 98.5% Recovery
- R134A
- Made in the USA

How can Robinair's industry leading 34788 A/C recover, recycle, and recharge A/C machine get any better? Here's how. The new Robinair 34788NI is a combination of easy use and superior accuracy. It recovers, recycles, evacuates, leak tests, and recharges R-134a quickly and accurately. The fully automatic function will recover, vacuum, leak test, and charge on its own without the need to stand and monitor the machine. The product is fully SAE J2788 compliant and meets new SAE refrigerant recovery standards for servicing vehicles with high voltage compressors. It's one machine to safely service both conventional and high voltage A/C systems. Includes Robinair's patented Automatic Refrigerant Refill feature which maintains a user-selectable amount of refrigerant in the internal vessel and signals when it's time to change the supply tank, no monitoring required. Automatic oil drain. A larger, easier to read color display now comes standard on the new 34788NI. The product can also be upgraded to include a printer, refrigerant identifier, or wireless module for wireless communications to Bluetooth devices or an internal shop network. An optional refrigerant charge and oil capacities database is available for North American market vehicles which saves time from having to look up unknown charge amounts.
